

K.Prabhavathi, K.Tamarai Selvi, K.N.Poornima, A.Sarvanan, Role of Biological Sex in Normal Cardiac Function and in its Disease Outcome - A Review (Published in Journal of Clinical and Diagnostic Research. 2014 Aug, 8(8): BE01 - BE04)

An error was brought to the attention of the editors regarding a factual inaccuracy in the line supported by reference 5 (page 1, right column). The statement “As men ages they lose an average of 1gm of cardiac mass everyday” was erroneously printed and has now been corrected to “As men age, they lose an average of one gram of cardiac mass per year.” During the correction process, we again re-reviewed the manuscript for any other oversights. The following edits to have been made to improve or correct the message conveyed.

- A sentence was added preceding reference [11] on page 1.

- On page 3, the word “Wild-type” has been added in the sentence supported by reference no. [32].

- Three typo errors in the reference numbering within the text have been corrected. On page 1, the reference [3] has been changed to reference [7] following the words “regular exercisers.” On page 3, the reference number [36] has been changed to [35] after the word “agonist,” and on same page the reference [38] has been changed to [39] following the words “plasma membrane”.
